

Public Meeting Notice

Project: PH 0014(201)232 PCN 04JA, Hughes County

Location: Intersection of US14 & US14B

Improvement Type: Intersection Modification

SDDOT will be hosting a public meeting/open house on Monday, July 13, 2015, at 7 p.m., at the RedRossa Italian Grille (Hills/Highlands Ballroom) in Pierre to talk about changes and improvements to the intersection of U.S. Highway 14 and Garfield Avenue (Truck Route) in Pierre. This meeting is designed to gain public input in the planning process and allow everyone the opportunity to voice ideas on the project. The subject project could possibly include changes to the configuration of the intersection of U.S. 14/14B as well as the intersection of U.S. 14/Kingsway Avenue.

SDDOT recently hired a consultant to aid in the review of the area from a safety and functional standpoint. Numerous alternatives were identified to look at possible improvements to the safety of the intersection.

SDDOT has partnered with the city of Pierre and Hughes County to review multiple options to address the traffic and safety needs in the vicinity of the two intersections. Discussions have narrowed the long list of options to three viable options to discuss with the public. These three options not only include the possibility of major changes at the intersection of the truck route (Garfield Avenue), but will also include options regarding access to Kingsway Avenue and North Airport Road. SDDOT will also have a blank map for other ideas from the public.

SDDOT would like the public's help in gaining additional insight into the project in order to meet its mission statement of providing a safe and efficient transportation system for all to use.
