

I-90 Exit 59 (La Crosse Street) Interchange Options Study

Study Information

Study Goals:

- Identify improvements for interchange capacity and safety

Reasons for the Study:

- Interchange serves the growing north-northeast edge of the community
- Interchange is becoming increasingly congested
- Interchange has elevated crash rates
- Adjacent access is below minimum standard

Reasons for the Public Meetings

- Obtain input from users and local businesses on specific areas of concern
- Formulate ideas for improving traffic flow and safety

Items to be Considered:

- Different types of interchange configurations
- Accesses along La Crosse Street
- Bicycles/pedestrians
- Traffic operations
- Safety

Study Schedule (Tentative)
